Chapter 1

- Who are the National EMS standards recommended by?
- Who regulates standards under which EMS systems provide care?
- What is the function of the National Registry of EMTs do?
- What is a student able to do after they complete an AEMT course?
- The ability to function as an AEMT is governed locally by whom?
- Define reciprocity
- What are the standard licensure requirements for AEMT licensure?
- What interventions are AEMTs trained and licensed to perform?
- Define ALS skill. Give an example of an ALS skill
- At what level of EMS training are personnel able to use an automatic transport ventilator when transporting a patient?
- What is an enhanced 911 system?
- Define online medical control and give an example
- Explain what is meant by standing orders
- What is a primary service area?
- Define quality improvement
- Explain a knowledge-based error and give an example
- What is a second prevention strategy? Give an example
- How are AEMTs involved in research?
- What type of attitude should be maintained when managing every patient?
- Identify roles and responsibilities of an AEMT
- What does continuous quality improvement involve?
- What is meant by advocating for a patient?
- If responding to an unsafe scene, what must the AEMT do?
- Define empathy
- What is meant by a self-motivated AEMT?
Chapter 2

- What are the five stages of grieving? Give an example of each stage
- What is the most successful way of preventing the spread of disease?
- What is Critical Incident Stress Management/Debriefing?
- What are the warning signs of stress?
- Within how many hours of the incident should CISD be performed?
- What are standard precautions?
- What are the minimum standard precautions that should be taken when delivering a baby?
- What should be done if a dirty needle stick occurs?
- How is HIV transmitted?
- Explain the difference between cover and concealment
- What is a likely reaction of family members when death of a CHRONICALLY ILL loved one occurs?
- Define infectious disease
- What is the minimum PPE that should be worn while suctioning a patient’s airway?
- What special precautions should be taken when managing the care of a patient with tuberculosis?
- What are some effective strategies to deal with chronic stress?
- Define indirect contact/exposure
- What types of bodily fluids can transmit disease? What is the least likely fluid to transmit disease?
- Define partial immunity
- Define lifelong immunity
- What types of food give the most reliable source of energy for the body
Chapter 3

- What types of situations do AEMTs have a legal duty to act?
- What defines the scope of practice?
- What should you do if a patient is alert, oriented, and refusing care?
- Define battery
- Define advance directive
- Define expressed consent
- Define abandonment
- When would implied consent be obtained?
- Define gross negligence
- What are the components of negligence?
- Define assault
- What is the difference between libel and slander?
- Define informed consent
- When a minor is refusing treatment but parents are requesting it, what should you do?
- How do you treat a patient that has a DNR?
- Under what circumstances can a minor be treated as an adult?
- When can a patient refuse treatment and/or transport?
- Why should everything be documented?
- What are the requirements of a DNR?
- What is the Good Samaritan Law?
- What are presumptive signs of death?
